

# Reading Framework 2021:

The Reading Framework, formed through the contributions of literacy experts and school leaders. It sets out the core principles of teaching reading for children in Reception and year 1, and for older pupils who have not yet mastered the foundations. It provides support and guidance for school leaders, classroom teachers and Initial Teacher Training partnerships about how to create a school environment where every child is not only able to read proficiently, but also develops a genuine love of reading.

This Framework contains useful audits and top tips for parents such as Appendix 1. For parents: reading stories to children

Here you will find useful leaflet that you might create for parents and carers. Further guidance is available: [10 top tips for parents to support children to read](#)

## **Education Endowment Foundation (EEF) support for word reading and comprehension**

In November 2021 the EEF produced The Reading Comprehension House which serves to illustrate how other building blocks for reading underpin word reading and comprehension. This graphic was produced as part of their Improving Literacy at Key Stage 2 update.
